AJITHKUMAR M

Java Full Stack Developer

Namakkal, Tamil Nadu | 8344385592 | ajithkishore06@gmail.com | linkedin.com/in/ajith-kumar-0889101b1

PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of experience building scalable, high-performance enterprise applications with Java, Spring Boot, JPA/Hibernate, RESTful APIs, microservices, React.js, JavaScript, HTML and CSS. Delivered cloud optimization and advisory features on the ComPaaS platform for global clients Kyndryl and IBM, using MySQL, PostgreSQL and MongoDB. Strong in cloud-based application development on GCP, AWS and Azure, API design, SQL optimization, production troubleshooting, unit testing and Agile delivery. Uses AI-assisted development tools to build applications faster and with higher quality.

TECHNICAL SKILLS

Backend: Java 8+, J2EE, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Material UI, Bootstrap, Micro Frontend (Webpack Module Federation), JSF, PrimeFaces

Databases: MySQL, PostgreSQL, MongoDB, SQL (joins, subqueries, stored procedures)

Cloud & Servers: Google Cloud Platform (Compute Engine, Cloud Storage, IAM, Cloud Logging), AWS (EC2), Azure, Apache Tomcat

Tools & Practices: Git, SVN, IntelliJ IDEA, Eclipse, NetBeans, JUnit, Postman, SonarQube

Build & CI/CD Tools: Maven, Jenkins

Code Quality & Testing: Unit testing, Code review, Debugging, Production issue troubleshooting, Backend performance tuning

Delivery Practices: Requirements gathering, Agile Scrum collaboration, Cross-functional collaboration, Feature implementation, Release support

AI Tools: Prompt engineering, AI-assisted development (Claude, GitHub Copilot, ChatGPT)

PROFESSIONAL EXPERIENCE

Java Full Stack Developer — Sep 2021 – Apr 2026

Corent Technology Pvt. Ltd., Chennai

- Designed and developed REST APIs and microservices in Java and Spring Boot for frontend-backend integration.
- Built reusable React.js components and responsive UIs with Material UI, including validation, error handling and state management.
- Designed database solutions in MySQL and MongoDB and optimized SQL queries to improve response time.
- Deployed and supported Spring Boot applications on Apache Tomcat, GCP Compute Engine and AWS EC2 across dev, test and production.
- Resolved defects, API integration issues and production problems through log analysis and root-cause analysis, improving stability.
- Collaborated with developers, QA and business analysts in Agile/Scrum teams, from sprint planning and stand-ups to client reviews.

PROJECTS

ComPaaS: Cloud Optimization & Advisory Platform

Role: Full Stack Developer | **Client:** Kyndryl, IBM | **Duration:** Sep 2021 – Apr 2026

Tech Stack: Java, Spring Boot, JPA/Hibernate, MySQL, MongoDB, Maven, JUnit | Frontend: React.js, JavaScript, HTML5, CSS3, Material UI

- Built cloud advisory and optimization features that identify cost-saving and resource-optimization opportunities.
- Implemented multi-cloud provider synchronization to detect unused and underutilized cloud resources across multiple cloud providers.
- Contributed to cloud modernization and migration initiatives with a focus on reliability, scalability and performance.
- Worked with QA teams to deliver reliable, high-quality releases.

SurPaaSAI: React Dashboards & Cloud Monitoring | **Duration:** 2 Months

Tech Stack: React.js, JavaScript,

- Developed React-based dashboards for cloud monitoring and cost optimization, with real-time data visualization.
- Implemented UI components and features to improve user engagement and cloud resource management
- Improved cloud resource management workflows to help identify unnecessary resource usage and potential cost saving

CERTIFICATION

Java Full Stack Developer Certification, Accord Info Matrix, Chennai (June 2021)

EDUCATION

B.E. Electronics and Communication Engineering, Anna University — 2016 – 2020

Paavai Engineering College, Namakkal
